Samira Ali
Probe It Food Safety
2 Bloor St E #3500,
Toronto, ON M4W 1A8

This letter is to advise that we have evaluated the Probe It curriculum and the examination for equivalency with Manitoba Health's food safety training program. The course content covers key points, such as Foodborne illness, Food Contamination, Basic Microbiology and Factors affecting Microbial Growth, Food Safety Management System, Time/Temperature Controls for Potentially Hazardous Foods, Facility and Equipment, Cleaning and Sanitation and personal hygiene. Additionally, the course examination meets our requirements.

We would like to advise you that Probe It and the examination have met the Manitoba Health requirements and therefore we have decided to grant approval to proceed with offering this program in Manitoba.

All individuals who successfully complete the Probe It program will have to have their details submitted along with the \$36 fee in order to receive the Manitoba Health Food Handler Training Certificate. This certificate is valid in Manitoba for 5 years. These individuals will be entered into Manitoba Health's food handler training database.

Please Contact the clerk for our food handler training program at 204-945-3705, or toll free at 1-855-236-1566. She can assist you in registering as a contractor, and can explain the process for submitting the client details.

Sincerely,

Peter Parys
Director of Food Protection
